1. PREFACE

This project was undertaken at International institute of Professional Studies, Indore for the minor project submission within the seventh semester of MTech (sry5-)TI. The project is called as tablet.

The purpose of this report is to assemble under one cover a sufficient body of knowledge about management and development a successful of Desktop application project. The following quotes outline the basic idea behind this technical report.

This report is about the adaptation of the techniques of project development and reflects the practice and methods of software engineering project this report is intended for

- Project coordinators —the tutorial presents the state of the follow in code development and management techniques.
- Programmers, analysts, and alternative pc personnel —the report contains a general description of—and issues in—Desktop application project development, and variety of methodologies and techniques for managing a software development project.

1. PREFACE

This project was undertaken at International institute of skilled Studies, Indore for the minor project submission within the seventh semester of MTech (sry5-)TI. The project is called as tablet.

The purpose of this report is to assemble underneath one cowl a sufficient body of knowledge concerning management and development a prospering of Desktop application project. the subsequent quotes define the fundamental plan behind this technical report.

This report is concerning the variation of the techniques of project development and reflects the follow and strategies of code engineering project this report is intended for:

- Project coordinators —the tutorial presents the state of the follow in code development and management techniques.
- Programmers, analysts, and alternative pc personnel —the report contains a general description of—and issues in—Desktop application project development, and variety of methodologies and techniques for managing a software development project.

2. ABSTRACT

I have developed a TEXT EDITOR using Eclipse in Java. It exhibits the fundamental

functionalities that any text editor ought to have however I even have customized. Eclipse was chosen as a result of any editor needs an honest Graphical interface and Eclipse offer that.

The functions incorporated required correct syntaxes for correct functioning and this was done by Java.

My next challenge was to understand all syntaxes and place them in correct places within the source code.

3. AIM OF THE PROJECT

The main aim and reason behind the planning and developing this desktop application, Java based totally code project is to produce engaging, user friendly and effective interface to the user over the varied OS.

Java packages, oops conception, file handling accustomed develop this desktop application. wherever all the users will do their basic stuffs like creating notes, writings journals, managing docs. Users can have all the choices and options in this application like making new file, saving the present file, printing the file, copy, paste, cut, selectall the text field.
